

Dear Family,

Your child attended the **Fairbanks Children's Museum Today**. The Museum features an air-maze, water table, pin screen, video-microscope, climbing wall, light table, dig-pit, diner, imaginary lab, and rotating building exhibits! **(Be sure to ask your child about the pin screen and the air maze!)** All of our exhibits are interactive and educational and encourage children to play together. **Ask your child what exhibit was their favorite, and why?**

Your child also may have attended a workshop with us today. We learned through art, science, drama, music, and story. **Ask them about what and how they learned!**

We aim to inspire young makers and creators, with our imagineering lab stocked with recyclables and art supplies! **Ask your child if they constructed something today, and what inspired that creation!**

We hope that your child enjoyed their field trip, and will share some thoughts about their experience with you. **It is also our wish that you will come back and make some new memories together.**

Sincerely,

The Staff of the Children's Museum
